Mohamed Younes

mohamed.younes@ensit.u-tunis.tn +216 26 239 299 mohamed-younes MedYounes

Profile

Final-year Computer Science engineering student at ENSIT seeking a 6-month PFE internship (from Feb 2027) in full-stack or DevOps. Experienced in microservices, REST APIs, Angular, Docker and CI/CD.

Education

National School of Engineers of Tunis (ENSIT) *Tunis, Tunisia*
Engineering Degree in Computer Engineering *Sep 2024 – Present*

Preparatory Institute for Engineering Studies of Kairouan (IPEIK) *Kairouan, Tunisia*
Preparatory Cycle in Mathematics and Physics *Sep 2022 – Jun 2024*

Experience

Software Engineering Intern – SGAS Platform *Tunis, Tunisia*
SFM Technology *Jul 2026 – Sep 2026*

- Designed an Automated Spectrum Management System compliant with ITU-R SM.1370, built on Spring Boot microservices (Eureka, Config Server, Gateway) with PostgreSQL
- Implemented a FastAPI revenue-forecasting ML microservice and a JWT-secured Angular 18 frontend

Web Development Intern *Tunis, Tunisia*
Allence Tunisie *Jun 2025 – Jul 2025*

- Built a full-stack user management system (Flask, MongoDB, Angular) with JWT authentication and RBAC
- Created a full-stack housing app with listing search, applications and duplicate prevention
- Engineered a Book Catalog REST API with pagination, filtering, Pydantic validation and Swagger UI

Projects

CardioAgent-Ops – MLOps and Multi-Agent AI Platform (ongoing) *GitHub: cardioagent-ops*

- Architecting a heart sound analysis platform of 6 Docker microservices orchestrated with Docker Compose
- Established the FastAPI gateway: multi-stage Dockerfile, 94% test coverage, GitHub Actions CI/CD
- Benchmarking 5 ML/DL models in the audio engine with MLflow tracking and ONNX export

FreelanceHub – Freelance Platform *Feb 2026 – May 2026*

- Collaborated with a team of 3 on a cross-platform freelance marketplace connecting clients and freelancers
- Developed a Flask REST API secured with role-based access control and JWT-protected routes
- Delivered a 16-screen mobile-friendly Angular/Ionic interface with automatic token handling

Smart University App *Feb 2026 – May 2026*

- Contributed to a university mobile platform (Ionic, Angular, Spring Boot) with 4 role-based user spaces
- Integrated a RAG AI assistant over course materials (ChromaDB) answering student questions with sources

Technologies

Languages: Java, Python, C/C++, SQL, JavaScript, TypeScript, HTML/CSS

Frameworks and Databases: Angular, Ionic, Spring Boot, Flask, FastAPI, PostgreSQL, MongoDB, MySQL

DevOps and ML: Docker, Docker Compose, GitHub Actions, Pytest, Git, MLflow, ONNX Runtime, PyTorch

Spoken Languages: Arabic (native), French (fluent), English (fluent)

Certifications: AWS Academy (Cloud, ML Foundations), Cisco Academy (CCNA courses)
